

IN THE CLAIMS

Please amend the claims as follows.

1. (Currently Amended) A [method]computer program product embodied on a computer readable medium for organizing patents utilizing a computer-implemented system, comprising:  
computer code for displaying a notes field for receiving manually entered notes including text;  
computer code for storing the manually entered notes in association with at least one identifier, thus associating the manually entered notes with the at least one identifier;  
computer code for allowing the manual selection of a file;  
computer code for storing the manually selected file in association with the at least one identifier by providing a correspondence between the file and the at least one identifier, thus associating the manually selected file with the at least one identifier, wherein a manually selected first file is associated with a first identifier corresponding to a single patent, and a manually selected second file is associated with a second identifier corresponding to a group involving a plurality of patents; and  
computer code for associating a plurality of patents with the at least one identifier;  
wherein the manually entered notes, at least one of the manually selected files, and the patents are accessible by subsequent selection of the at least one identifier;  
wherein a set of patents is reported [by]using:  
computer code for displaying a technology mapping depicting at least one category of technology utilizing a graphical user interface,  
computer code for displaying statistics regarding a number of the patents of the set in each category of technology,  
computer code for displaying first additional information associated with at least a portion of the patents of the set upon the selection of an icon, wherein the first additional information includes a list of the patents of the set associated with one category of technology,  
computer code for displaying second additional information associated with at least one of the patents of the list upon the selection of an additional

-3-

icon, wherein the second additional information is selected from the group consisting of a patent number, a status, an exemplary claim, and an exemplary figure,

wherein the statistics are displayed in a first interface, the first additional information is displayed in a second interface separate from the first interface, and the second additional information is displayed in a third interface separate from the first interface and the second interface;

wherein the notes and at least one of the files are made accessible to other parties utilizing e-mail;

~~wherein said method is, at least in part, carried out utilizing the computer-implemented system.~~

2. (Original) The computer program product of claim 1, wherein the at least one identifier is determined by selecting an already-existing identifier.

3. (Cancelled)

4. (Original) The computer program product of claim 1, wherein the at least one identifier is determined by selecting an already-existing identifier utilizing a pull-down menu.

5. (Original) The computer program product of claim 1, wherein the at least one identifier is determined utilizing an add icon.

6. (Original) The computer program product of claim 1, wherein the at least one identifier is determined utilizing a modify icon.

7. (Original) The computer program product of claim 1, wherein the notes field allows a user to cut and paste notes.

8. (Original) The computer program product of claim 1, wherein the file is selected utilizing a file structure field.

9. (Original) The computer program product of claim 8, wherein the file structure field includes a file tree-structure.

-4-

10. (Original) The computer program product of claim 8, wherein the file structure field allows a user to browse various folders where files have been previously stored.

11. (Original) The computer program product of claim 8, wherein the file structure is displayed simultaneously with the notes field on the same interface.

12. (Original) The computer program product of claim 1, wherein the patents associated with the at least one identifier are identified by searching a database of already existing identifiers.

13. (Original) The computer program product of claim 12, wherein the database is a comprehensive database of all patents issued by at least one government agency.

14 – 17. (Cancelled)

18. (Currently Amended) An ~~intellectual property data structure stored on a computer readable medium encoded with an intellectual property data structure for realizing the function of organizing and reporting information associated with an identifier, comprising:~~

an identifier object;

a notes object correlated with the identifier object for tracking manually entered notes including text associated with the identifier object;

at least one file object correlated with the identifier object by providing a correspondence between the file object and the identifier object, for tracking manually selected files associated with the identifier object, wherein a manually selected first file is associated with a first identifier corresponding to a single patent, and a manually selected second file is associated with a second identifier corresponding to a group involving a plurality of patents; and

at least one patent object correlated with the identifier object for tracking a plurality of related patent identifiers associated with the identifier object;

wherein a set of patents is reported utilizing the computer readable medium by with:

computer code for displaying a technology mapping depicting at least one category of technology utilizing a graphical user interface,

-5-

computer code for displaying statistics regarding a number of the patents of the set in each category of technology,

computer code for displaying first additional information associated with at least a portion of the patents of the set upon the selection of an icon, wherein the first additional information includes a list of the patents of the set associated with one category of technology,

computer code for displaying second additional information associated with at least one of the patents of the list upon the selection of an additional icon, wherein the second additional information includes a patent number, a status, an exemplary claim, and an exemplary figure,

wherein the statistics are displayed in a first interface, the first additional information is displayed in a second interface separate from the first interface, and the second additional information is displayed in a third interface separate from the first interface and the second interface;

wherein the notes and at least one of the files are made accessible to other parties utilizing e-mail.

19. (Currently Amended) A method for organizing patents utilizing a computer-implemented system, comprising:

displaying a notes field for receiving manually entered notes including text;

storing the manually entered notes in association with at least one identifier, thus associating the manually entered notes with the at least one identifier;

allowing the manual selection of a file;

storing the manually selected file in association with the at least one identifier by providing a correspondence between the file and the at least one identifier, thus associating the manually selected file with the at least one identifier, wherein a manually selected first file is associated with a first identifier corresponding to a single patent, and a manually selected second file is associated with a second identifier corresponding to a group involving a plurality of patents; and

associating a plurality of patents with the at least one identifier;

wherein the manually entered notes, at least one of the manually selected files, and the patents are accessible by subsequent selection of the at least one identifier;

wherein the notes field allows a user to cut and paste notes;

wherein the file is selected utilizing a file structure field including a file tree-structure that allows a user to browse various folders where files have been previously

-6-

stored, where the file structure is displayed simultaneously with the notes field on the same interface, the file selected utilizing the file tree-structure including information from a source separate from the patents;

wherein the patents associated with the at least one identifier are identified by searching a database including a comprehensive database of all patents issued by at least one government agency;

wherein a set of patents is reported by:

displaying a technology mapping depicting at least one category of technology utilizing a graphical user interface,

displaying statistics regarding a number of the patents of the set in each category of technology,

displaying first additional information associated with at least a portion of the patents of the set upon the selection of an icon, wherein the first additional information includes a list of the patents of the set associated with one category of technology,

displaying second additional information associated with at least one of the patents of the list upon the selection of an additional icon, wherein the second additional information is selected from the group consisting of a patent number, a status, an exemplary claim, and an exemplary figure,

wherein the statistics are displayed in a first interface, the first additional information is displayed in a second interface separate from the first interface, and the second additional information is displayed in a third interface separate from the first interface and the second interface;

wherein the notes and at least one of the files are made accessible to other parties utilizing e-mail;

wherein said method is, at least in part, carried out utilizing the computer-implemented system including computer code embodied on a computer readable medium.

20. (Currently Amended) A [method] system including a computer readable medium for organizing patents, comprising:

computer code for displaying a notes field for receiving manually entered notes including text;

-7-

computer code for storing the manually entered notes in association with at least one identifier, thus associating the manually entered notes with the at least one identifier;

computer code for allowing the manual selection of a file, wherein the file is selected utilizing a file structure field including a file tree-structure that allows a user to browse various folders where files have been previously stored, where the file structure is displayed simultaneously with the notes field on the same interface, the file including information from a source separate from the patents;

computer code for storing the manually selected file in association with the at least one identifier by providing a correspondence between the file and the at least one identifier, thus associating the manually selected file with the at least one identifier, wherein a manually selected first file is associated with a first identifier corresponding to a single patent, and a manually selected second file is associated with a second identifier corresponding to a group involving a plurality of patents; and

computer code for associating a plurality of patents with the at least one identifier;

wherein the manually entered notes, at least one of the manually selected files, and the patents are accessible by subsequent selection of the at least one identifier;

wherein a set of patents is reported [by] with computer code for:

displaying a technology mapping depicting at least one category of technology utilizing a graphical user interface,

displaying statistics regarding a number of the patents of the set in each category of technology,

displaying first additional information associated with at least a portion of the patents of the set upon the selection of an icon, wherein the first additional information includes a list of the patents of the set associated with one category of technology,

displaying second additional information associated with at least one of the patents of the list upon the selection of an additional icon, wherein the second additional information includes a patent number, a status, an exemplary claim, and an exemplary figure,

wherein the statistics are displayed in a first interface, the first additional information is displayed in a second interface separate from the first interface, and the second additional information is displayed in a third interface separate from the first interface and the second interface;

-8-

wherein the notes and at least one of the files are made accessible to other parties utilizing e-mail;

~~wherein said method is, at least in part, carried out utilizing the computer-implemented system.~~

21. - 43. (Cancelled)

44. (Currently Amended) An ~~intellectual property data structure stored on a~~ computer readable medium encoded with an intellectual property data structure for realizing the function of organizing and reporting information associated with an identifier, comprising:

an identifier object;

a notes object correlated with the identifier object for tracking manually entered notes including text associated with the identifier object; and

at least one patent object correlated with the identifier object for tracking a plurality of related patent identifiers associated with the identifier object;

wherein a set of patents is reported utilizing the computer readable medium by with:

computer code embodied on the computer readable medium for displaying a technology mapping depicting at least one category of technology utilizing a graphical user interface,

computer code embodied on the computer readable medium for displaying statistics regarding a number of the patents of the set in each category of technology,

computer code embodied on the computer readable medium for displaying first additional information associated with at least a portion of the patents of the set upon the selection of an icon, wherein the first additional information includes a list of the patents of the set associated with one category of technology, and

computer code embodied on the computer readable medium for displaying second additional information associated with at least one of the patents of the list upon the selection of an additional icon, where the second additional information includes a patent number, a status, an exemplary claim, and an exemplary figure;

wherein the statistics are displayed in a first interface, the first additional information is displayed in a second interface separate from the first interface, and the second additional information is displayed in a third interface separate from the first interface and the second interface;

wherein the notes are made accessible to other parties.

45. (Currently Amended) An ~~intellectual property data structure stored on a computer readable medium encoded with an intellectual property data structure for realizing the function of organizing and reporting information associated with an identifier, comprising:~~

an identifier object;

a notes object correlated with the identifier object for tracking manually entered notes including text associated with the identifier object;

at least one file object correlated with the identifier object by providing a correspondence between the file object and the identifier object, for tracking manually selected files associated with the identifier object; and

at least one patent object correlated with the identifier object for tracking a plurality of related patent identifiers associated with the identifier object;

wherein a set of patents is reported utilizing the computer readable medium by with:

computer code embodied on the computer readable medium for displaying a technology mapping depicting at least one category of technology utilizing a graphical user interface,

computer code embodied on the computer readable medium for displaying statistics regarding a number of the patents of the set in each category of technology,

computer code embodied on the computer readable medium for displaying first additional information associated with at least a portion of the patents of the set upon the selection of an icon, wherein the first additional information includes a list of the patents of the set associated with one category of technology, and

computer code embodied on the computer readable medium for displaying second additional information associated with at least one of the patents of the list upon the selection of an additional icon, where the second

-10-

additional information includes a patent number, a status, an exemplary claim, and an exemplary figure;

wherein the statistics are displayed in a first interface, the first additional information is displayed in a second interface separate from the first interface, and the second additional information is displayed in a third interface separate from the first interface and the second interface.
